The GSC 2027 annual meeting will be located at the 5-start beachfront resort **Hotel Casa Grande**, Guarujá, Brazil, located on Enseada Beach, July 27-30, 2027.

The GSC community spans the globe, including international researchers working in collaborative groups to provide a forum for developing and implementing community-driven standards in genomics, 'omics', and bioinformatics. Participants in the GSC include clinicians, biologists, chemists, computer scientists, groups building genomic and 'omic databases, researchers conducting large-scale metagenomics and comparative genomic analyses, and individuals experienced in building community-based genomic standards.

Since its founding in 2005, the GSC's Mission has focused on making genomic data discoverable, reusable, and interoperable through:

The implementation of new community-driven genomic standards
The establishment of methods of capturing and exchanging metadata
Harmonization of metadata collection and analysis efforts across the wider genomics community
Developing and making available standards-related resources and tools to help leverage the exponentially-increasing amount of genomics and metagenomics datasets
Implementing standards for reproducibility across all areas of genomics
